TIANCHI (ERIC) FU

AI Product Manager | 3 yrs at Huawei Cloud & OpusClip | MSc candidate, NUS (Jun 2027)
Singapore | (+65) 8349 2379 | ericfu-tianchi@outlook.com | linkedin.com/in/tianchi-fu | tianchifu.com

SUMMARY

- **AI Full-Stack Expertise:** 3 years turning model capability into product across enterprise AI (AI PaaS/Orchestration/SaaS at Huawei Cloud) and consumer creative AI (generative video/image/audio at OpusClip), from model evals to 0→1 launches.
- **Tech × Design:** An engineer's logic and a designer's hands - I write the PRD, build the prototype, and align R&D, design, and business around one call, turning complex AI systems into intuitive experiences.
- **Builder's Instinct:** Build with AI constantly, at work and after hours - shipped solo: an agent editor that turns my noisy AI feeds into a daily newspaper, a pixel fighting game, a 3D cube solver, a portfolio site built as a desktop OS, and counting.

WORK EXPERIENCE

OpusClip May 2026 - Present

AI Product Manager Intern Singapore

Owned model evaluation and AI feature delivery across OpusClip (AI clip editor, 16M+ creators) and Agent Opus (its AI video agent).

- **Built video/image model eval system 0→1:** Dimension Tests on 10+ dimensions and Integrated Tests with their eval sets, scored by LLM judges into side-by-side reports the team votes in; shipped as a Claude Code agent plugin, then a company-wide platform.
- **Turned evals into model decisions:** Vidu Q3 took the entry tier at Seedance 1.5's quality and ~2/3 lower COGS; Gemini Omni's physics won Motion Graphics and its video-editing unlocked Viral Presets; Seedance 2.5 shipped on release day; and more.
- **Owned Music across both products:** launched AI BGM on Agent Opus, now on ~30% of exported videos for 16.6K creators a month, lifting export rate 3pp; shipped Music Import and Fade on OpusClip, with AI music next on the roadmap.
- **Led creator research end to end:** wrote the guide, segmented users into 3 cohorts, recruited and interviewed 13 creators, and narrowed findings into 8 problems worth fixing - now driving the AI B-roll rebuild and layout/cropping work on Editor & Fine Cut.

Huawei Technologies Co., Ltd Sep 2023 - Feb 2026

Product Manager / Product Designer Shenzhen, China

Drove Huawei's AI stack from PaaS to SaaS, serving 200K+ employees internally and Huawei Cloud's enterprise market.

1. Internal AI Orchestration Platform - *Scaling internal AI adoption*

- Led Prompt Studio 2.0 revamp for better and faster prompts, through templates, live previews, few-shot library, and a one-click prompt optimizer; drove MAU 480+ → 1,800+ (3.7×), prompt assets 17K → 72K (4.2×), and 10M+ monthly prompt inferences.
- Launched Copilot Builder (0→1): a low-code platform that standardized how AI agents are orchestrated, embedded, and branded across internal systems, cutting delivery cycles from months to days and powering 80+ agents and 1.1M annual employee queries.

2. Huawei Cloud AI PaaS (Model Dev Platform) - *Bridging foundation models to enterprise production*

- Rebuilt Model Eval Center from a sub-feature into a core module: a new "eval-set + rubric" baseline made every task comparable (30+ benchmarks preloaded), and AI-as-a-Judge cut eval time from 3 days to 0.5; served 150+ tasks and 10+ Tier-1 customers.
- Drove Data Engineering across 5 releases and 15+ enterprise deliveries, turning one-off manual setups into reusable assets: a 200+ operator library, saved operator templates, and a 0→1 data workflow that set the 2.0 roadmap and unlocked solution pricing.

3. Huawei Cloud AI SaaS - *Turning AI into products enterprises can buy*

- Incubated ChatBI: a conversation-first BI paradigm cutting time-to-insight from hours to seconds; won 5+ flagship accounts.
- Expanded Enterprise AI Search with multimodal search, deep research, and richer RAG config; delivered to 50+ cloud customers.

LEADERSHIP & PROJECTS

RefugeeOne (Chicago-based Non-profit) - *Product Owner & Frontend Developer* Jan 2023 - May 2023

Led a 7-person team to turn manual Excel-based job screening into a three-sided hiring platform (employers post, refugees apply, staff review) from 0→1 in 4 Agile sprints; within a year it hosted 600+ listings and 75+ employers, lifting job-matching efficiency by 80%.

AI Side Projects (2026): Tianchi OS (tianchifu.com), a desktop-OS portfolio of my work, with playable AI builds (3D My Lego World, pixel-art game Soul Blade, Rubik's Cube Solver); plus an AI news agent and Handoff (an open-source Claude Code skill).

EDUCATION

National University of Singapore - *MSc in Artificial Intelligence & Innovation* Aug 2026 - Jun 2027 (Expected)

University of Michigan, Ann Arbor - *MSc in Information (Human-Computer Interaction)* Sep 2021 - Jun 2023

- GPA: 3.8/4.0 | Two-time Student Project Expo Awardee (1st Prize 2022, 2nd 2023) | WolverineSoft Game Designer

Shanghai Jiao Tong University - *BEng in Electrical & Computer Engineering (Minor in Data Science)* Sep 2017 - May 2021

- GPA: 3.5/4.0 | Outstanding Undergraduate Scholarship | Exchange Student at NUS | AIESEC Core Member

SKILLS & OTHERS

- **Product & UX:** Roadmap, PRD, Model Eval, A/B Testing, User Interview, Prototyping, Agile/Scrum, Jira/Linear, Figma, Axure
- **Tech & Data:** Claude Code, GitHub, Python, C++, JavaScript, React, HTML/CSS, Vibe Coding, SQL, Pandas, Mixpanel, Statsig
- **Language & Interest:** English, Mandarin, Japanese (Basic); 50k-word personal wiki on tech & philosophy; explored 20+ countries
